

Association Healthcare has been named the Texas Nurse Practitioners Affinity Program for Individual and Group Medical, Life, Disability, Dental/Vision and other related insurance products.

We deliver benefits packages for employers, employees, and individual members that go beyond what's typically available in today's marketplace—while helping improve the bottom line for everyone involved. Our vendor partners understand the unique needs of the small to mid-sized market and are focused on building robust programs that provide meaningful savings to association members.

As an Affinity Program, we can offer discounts that otherwise would not be available.

PROGRAM FEATURES

Customized group and individual plans designed specifically for Texas Nurse Practitioners (TNP) members, offering flexibility through multiple carriers and product options.

Deductibles and coinsurance may be waived by hospitals and facilities for members, employees, and their covered dependents undergoing scheduled procedures.

Built-in first-dollar benefit programs limit an employee's exposure to deductible and coinsurance when they or their covered dependents experience an emergency.

Many of our Group Plans allow unused premiums to roll forward for additional savings in the next plan year.

CASE STUDIES

In 80% of the cases we manage, we're able to offer our clients significant savings on quality benefit packages. Check out the examples below:

28%

Savings delivered to an association member who switched to an Association Healthcare Plan that offered similar benefits.

32%

Savings realized by a new group switching from a Blue Cross Blue Shield plan to a comparable plan offered by Association Healthcare.

31%

Savings delivered to an association member who needed to cut costs without sacrificing coverage.

If you'd like to learn more about how association members have saved money with Association Healthcare plans, use the information below to schedule an appointment.
